

Energy Policy Statement

Creagh Concrete Products Ltd is a manufacturer of concrete, concrete products and supplier of aggregates.

All levels of Management recognise that all aspects of our operations consume energy and are committed to be efficient in the use of energy and natural resources in order to minimise both its impact on the environment and its energy costs. It recognises that changes will be required to achieve these aims and have implemented an energy management system that follows the principles of ISO 50001 and will ensure the following:

- To comply with applicable legal requirements and other requirements to which the Company subscribes related to its energy use, consumption and efficiency;
- Monitoring and measuring of energy usage to quantify consumption and identify significant and abnormal energy use;
- Explore localised energy generation across all facilities where possible;
- Ensure that all operational and purchasing decisions will included a consideration of energy efficiency;
- To establish energy objectives and targets and develop programs of work. Creagh will also provide the availability of information and necessary resources to review and ensure we achieve the objectives and targets;
- Ensure that all stakeholders have access to information relating to energy performance against targets;
- Continually improve energy management and performance and to always strive to reduce energy usage where possible.

This policy will be communicated to all employees, subcontractors and other interested parties and will be reviewed regularly for effectiveness and relevance to the business.
